The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by the admitted prior art fig 2.

The admitted prior art shows a method of filtering an error signal 250 using a multimode filter 270 by inputting an error signal 250, setting the frequency domain of the multimode filter based on the recording (preset during the manufacturing process) and extracting a frequency signal 255.

With respect to the limitations of claims 19 and 20. see element 250 wherein the disk is either one of the claimed limitations as shown in fig 1A.

Claims 1-14 are allowed.

None of the cited prior art shows or teaches filtering an error signal in an optical disk apparatus using a multimode filtering element having a "CAV mode filter", a "CLV mode filter" and a switching element to switch between either one of the mode filters as shown in fig 3.

Claims 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
